

Medical Center of the South

For more than a decade, Webster's position as the "Medical Center of the South" has been fueled by impressive, new, state of the art facilities, powered by more than 2,200 physicians who perform comprehensive procedures for a service area population that has exploded. Webster's medical center accommodates more than 1,800,000 patients annually, and that number is projected to continually escalate.

While Houston features the medical center of the north—the largest in the world, Webster's position as the medical center of the south is solidified by several components, including incredible residential growth within a 20-mile radius that encompasses more than 24 cities, new and expanding medical facilities, strong physician base, and highest levels of accreditation for comprehensive and specialized care. More and more patients rely on the medical center of the south, as they find Webster's medical sector easy to navigate, convenient, and situated in close proximity to restaurants, retail and entertainment venues, and hotels.

In Webster, hospitals constitute the City's largest industry sector in terms of capital investment, workforce, and economic impact. This sector continues to burgeon as demand for highest quality medical care grows.

Webster's medical center touts important accolades and unique attributes—it features the only level II chest pain center, pediatric emergency department, neonatal intensive care, level II trauma center, and dedicated heart hospital south of Houston's medical center.

The medical center of the south is conveniently positioned within a three-mile radius spanning NASA Parkway, Texas Avenue, Blossom, Orchard, Medical Center Boulevard, and Highway 3. The entire district is easily navigable with free parking, valet parking, and patient-friendly access.

HCA Houston Healthcare Clear Lake

At the nucleus of Webster's Medical Center is HCA Houston Healthcare Clear Lake, the region's first major medical facility, featuring a six-story complex with three patient towers, 595 beds, and a professional staff of more than 2,000. Since its inception in 1972, HCA Houston Healthcare Clear Lake has embarked on numerous expansion and remodel projects, including the latest \$92M expansion and renovation plan that resulted in a new 155,000 square foot patient tower, additional state of the art operating rooms, pre-operating rooms, and recovery rooms, a new 30-bed adult intensive care unit, and a women's and children's center. With more than 120,000 patient visits each year to its emergency room, the hospital opened an expanded and enhanced EMS bay designed to ease traffic congestion, expedite patient check-in, and ensure ambulance reliability with five dedicated ambulance parking spaces with electrical adapters that keep ambulances powered and covered walkways from the bay to the emergency.

HCA Houston Healthcare Clear Lake,
500 Medical Center Boulevard

More than 40 medical specialties and services are represented at HCA Houston Healthcare Clear Lake to provide services to 1.8M people.

HCA Houston Healthcare Clear Lake is the only Level II trauma center in the entire region and one of only 18 in Texas. The hospital's trauma services provides immediate, round-the-clock care for a total spectrum of trauma patients of all ages with dedicated trauma and operating rooms and helipad adjacent to the emergency department. Trauma services are comprised of trauma-trained physicians in the specialties of general surgery, anesthesia, orthopedic surgery, neurosurgery, reconstructive surgery, otolaryngology, urology, ophthalmology and cardiovascular surgery who are poised to provide treatment during the "golden hour," which refers to a critical time period that spans one hour following a traumatic injury.

Annually, *The Houston Business Journal* ranks the largest Houston-area hospitals according to number of inpatient admissions. HCA Houston Healthcare Clear Lake, with 29,000 inpatient admissions annually, is ranked as the second highest performing hospital in the Houston Metropolitan Statistical Area.

HCA Houston Healthcare Clear Lake has fostered a reputation for excellence for nearly four decades. Since 2007, HCA Houston Healthcare Clear Lake has invested more than \$200M in projects to expand and renovate its facility, including The Heart & Vascular Hospital, completed in 2007. The \$120M facility, which encompasses 305,000 square feet, is the only hospital south of Houston's medical center devoted to cardiology. This top-rated hospital, with Level II Chest Pain accreditation, features three open-heart surgery operating rooms, four cardiac catheterization labs, and 60 intermediate cardiac care beds.

In addition to the recent \$92M expansion project, HCA Houston Healthcare Clear Lake has continually led the way for the region's healthcare services. HCA Houston Healthcare Clear Lake expanded its Neonatal Intensive Care Unit to four times its original size—from 5,000 to 20,000 square feet, as the hospital delivers over 4,000 babies annually with more than 500 treated in the Neonatal Intensive Care Unit. Also, in 2008, the hospital opened the region's first Pediatric Emergency Department, including Pediatric Intensive Care and specialized pediatric services. In January 2011, the hospital featured the only pediatric surgeon south of Houston's medical center. Now, Clear Lake Regional Center's enhanced Pediatric Surgery Department augments many other areas, such as Neonatal and Obstetrics. With more than 33 pediatric surgery cases monthly, this flagship hospital receives young transfer patients from hospitals throughout Texas and represents cutting-edge technology for comprehensive pediatric care.

HCA Houston Healthcare Clear Lake is renowned for providing world-class medical care on nearly 20 acres on Medical Center Boulevard. This hospital consistently achieves highest ratings as it continually expands its services and facilities. Just as the hospital was the first in the region to acquire a surgical robot to employ innovative technology for less invasive surgery, smaller incisions, shorter hospital stays, and quicker recovery times, HCA Houston Healthcare Clear Lake remains unsurpassed in neonatal and pediatric services.

The Heart & Vascular Hospital

The Heart & Vascular Hospital, which opened in 2007, is the only exclusive heart hospital south of the Houston Medical Center. The 305,000 square foot, six-story hospital located at 495 Medical Center Boulevard and connected to HCA Houston Healthcare Clear Lake via a skywalk, accommodates a growing medical service area population who depends on the highest level of comprehensive cardiac care.

The Heart & Vascular Hospital,
495 Medical Center Boulevard

The Heart & Vascular Hospital is the only hospital south of Houston's Medical Center to achieve the full Cycle II Chest Pain Center Accreditation. As its name connotes, The Heart & Vascular Hospital specializes in the prevention, detection, and treatment of cardiovascular disorders. This state-of-the-art hospital features an emergency chest pain center, cardiovascular operating rooms, cardiac catheterization laboratories, intensive care beds, coronary care unit, and 132 private inpatient telemetry beds.

Inside the Heart & Vascular Hospital, Cardiac Catheterization Labs are equipped to provide ongoing and interventional care, including diagnostic services. The Emergency Room is capable of receiving 12-lead EKGs from EMS while transporting patients. The hospital was one of the first 12 facilities in the United States and one of the first two hospitals in Texas to receive approval for Carotid Artery Stenting from the Centers for Medicare and Medicaid Services.

UTMB Clear Lake Campus

This full-service hospital with 87 medical/surgical private patient rooms located at 200 Blossom offers world-class healthcare to the Webster region. The University of Texas Medical Branch's extensive network includes hospitals on four campuses and more than 90 clinics throughout Southeast Texas, renowned for primary and specialty care. For more than 125 years, UTMB has a proven track record for providing exceptional healthcare, training healthcare professionals, and serving as a healthcare innovator.

The magnificent, modern hospital at 200 Blossom and UTMB are a perfect match. Webster's growing medical service area population that exceeds 1.8 M people depend on the world-class healthcare and convenience that Webster's medical center provides.

UTMB Health Clear Lake Hospital offers a full array of women's services, cardiovascular services, neurosciences, medical and surgical services, 24/7 emergency department, radiology and imaging, outpatient laboratory services and much more.

UTMB Clear Lake Campus,
200 Blossom

Houston Physicians Hospital

One of Webster's most modern hospitals, Houston Physicians Hospital, located at 333 North Texas Avenue, is one of the top-ranked hospitals in the State, according to *Consumer Reports*. The hospital, which is 85% physician-owned, offers nearly every surgical specialty, with two exceptions—ob/gyn and ophthalmology. Due to the high success of this hospital, a recent expansion increased the number of operating rooms and beds. Within this attractive facility, which features over 80,000 square feet, there is a nine-bed pre-operative unit, six operating suites, two procedure rooms, and 21 private rooms.

Houston Physicians Hospital, 333 N. Texas Ave.

Within this premier hospital, top physicians specialize in general surgery, ear, nose, and throat, pain management, urology, neurology, plastic surgery, orthopedic surgery, podiatric

surgery, and wellness. Full, state-of-the-art radiology services are offered, including MRI, CT, along with a team of board-certified radiologists. Additionally, clinical support services, such as physical and occupational therapy, are part of the comprehensive offerings at Houston Physicians Hospital. Nurses and administrative staff seek out Houston Physicians Hospital for employment opportunities for the hospital's stellar team environment, quality of care, special ambience, and quarterly profit sharing.

PAM Rehabilitation Hospital of Clear Lake

PAM Rehabilitation Hospital of Clear Lake, located at 110 East Medical Center Boulevard, features 45 private suites, on-site pharmacy, laboratory, radiology, isolation rooms, high observation units, and innovative, state-of-the-art exercise/rehabilitation suites—on two floors. This premier 54,000 square foot rehabilitation hospital, which opened June 2015, enhances Webster's world-class medical offerings, as PAM Rehabilitation Hospital of Clear Lake's comprehensive services are unique to the region with a focus on maximizing patient recovery in areas, such as brain injury, spinal cord injury, amputation, stroke, wounds, and neurological disorders.

Bay Area Surgicare Center

Bay Area Surgicare Center, located at 502 Medical Center Boulevard, is a part of a national network of surgical centers guided by dedicated physicians and healthcare professionals who offer one-day surgery at competitive rates. The Webster facility, established in 1979, has experienced several expansions and contains the latest surgical equipment. Surgeons perform a great variety of procedures, with the most prevalent ones including arthroscopic knee surgery, cataract eye surgery, colonoscopy, shoulder surgery, and upper GI endoscopy. In fact, over 2,500 surgeries within each of those categories were performed last year inside this busy day-surgery center.

Kindred Hospital-Clear Lake

Kindred Hospital-Clear Lake, a long-term acute care hospital that opened in June 2005 at 350 Blossom, is designed for patients requiring extended hospitalization due to chronic disease or catastrophic illness or injury. This 92,000 square foot hospital features over 110 beds with the capacity for 24 intensive care patients, along with in-house physician coverage around-the-clock. Long-term acute care hospitals, like Kindred Hospital-Clear Lake, fill an important role in the continuum of patient care. Patients are

*Kindred Hospital - Clear Lake,
350 Blossom Street*

referred to Kindred Hospital for the continuation of acute medical care (generally 25-30 days) because the severity or complexity of their condition precludes them from being accepted into a rehabilitation hospital or skilled nursing facility. Kindred Healthcare is one of the largest and leading providers of long-term acute care in the national medical rehabilitation program.

Cornerstone Hospital of Houston-Clear Lake

Cornerstone Hospital of Houston-Clear Lake is a long-term acute care hospital, located at 709 Medical Center Boulevard. Cornerstone Hospital, with 149 beds, including a High Observation Unit, offers a dynamic interdisciplinary approach to the care of medically complex and catastrophically ill patients. The hospital is staffed 24-hours a day with experienced, critical care registered nurses certified in Advanced Life Support. Some of the specialized programs include wound care, pulmonary, and rehabilitation.
